- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

- Acceptance/Rejection criteria
- Mandatory Replacement Parts

SPECIFICATION

A Quality Plan for each of the following pieces of equipment will be requested from the successful tenderer before the commencement of the works:

- Hoists
- Winches
- Beams
- Crawls
- Jacks (including scissor, hydraulic and simplex)
- Portable Gantries

WORK PROCEDURE

The appointed service provider must have the following documents available for every lifting machine, before starting work on it:

- The approved quality plan for that machine
- An illustrated parts list giving the description and catalogue number of each individual part.
- The original record sheet issued by JW.

Where no illustrated parts list of a particular lifting machine is available, the Contractor must arrange all parts in a logical sequence and take a photograph on which all parts will be easily recognizable at the same time. He must then number each part on the photo and draw up clearly a set of parts list. This parts list must show the number of part illustrated, the description, any catalogue number that may be applicable and the quantity required per complete machine. This photograph, which must be printed on good quality paper and parts list shall belong to JW; and on completion of the work, a set of reproducible master copies must immediately be handed over to JW.

Where it should become necessary to prepare any manufacturing drawing of a part, this drawing must be approved by JW and a reproducible master copy must be handed over to JW immediately after approval.

TECHNICAL PROCEDURE

The appointed service provider will be issued with two (2) copies of the record sheet attached hereto as Appendix A. The contractor must acknowledge receipt of the item of equipment and sign accordingly. JW and the contractor shall both keep copies of the document, which shall be updated on a regular basis.

Each lifting machine must be serviced at the intervals and according to the procedures specified below.

- After every three (3) months, all lifting tackle belonging to each individual lifting machine, must be thoroughly cleaned and then examined and upgraded for compliance with the latest Driven

SPECIFICATION

Machinery Regulations promulgated under section 43 of the Occupational Health and Safety Act (No. 85 of 1993).

- After every six (6) months, each lifting machine must be given the same examination described above. The machine must also be stripped down to its individual parts, all of which are then to be thoroughly cleaned, thoroughly examined for wear and/or damage, and placed in a bin allocated only to the lifting machine. This bin must be large enough to hold all parts of the lifting machine so that no parts will get lost or interchanged with the similar parts from other lifting machines. The bins must be clearly marked to identify the lifting machine parts it contains.
- After the thorough examination described above, the contractor must follow the procedure as set out hereunder:
- Submit to JW a concise status report on the lifting machine and a recommended course of action, the object of which will be to maintain the original design capabilities of the machine.
- Arrange with the relevant manager of JW to inspect the parts of the machine at a date and time mutually satisfactory to the manager and the contractor. For this inspection, the contractor must display individual parts in a logical sequence based on his report and recommendations. The relevant manager of JW will give his final instructions in writing, preferably on the original record sheet.
- After completion of the inspection by JW, the contractor must repair, reassemble, lubricate and functionally test the machine at full load according to the agreed quality plan, and return to its original location with a certified copy of the relevant fitness certificate. JW will acknowledge receipt of the refurbished device on the original record sheet, which must then be kept by the contractor.
- After every twelve (12) months, the procedures described above must be repeated and the lifting machine must be proof tested to 1.1 times its rated capacity. The proof test must involve the maximum lengths of chains or ropes as well as the complete machine. The proof test must also be followed by a full load of functional test over the complete working range of the machine to ascertain that the machine is still working smoothly.

REPAIR WORKS

Any equipment which may break between mandatory services must be repaired according to the same procedures and conditions provided for the mandatory annual services, and the contractor must give the same warranty as specified on item 5.8.

Repairs on broken equipment must commence strictly on a time agreed between JW and the contractor, at the time when JW issues the necessary written order thereof. However, the delay between the writing of the order and the commencement of the repair work must not exceed two (2) working days.

Any repaired lifting equipment must be examined, inspected, tested and certified by a third-party entity (Lifting Machinery Entity). A safe to use certificate shall be issued by the third-party entity as well.

The contractor must submit with their quote a minimum of three pre-quotes for the spares to be used for repairs of lifting equipment. Where the spares to be used for the repairs are to be purchased from the Original Equipment Manufacturer (OEM), only one pre-quote from the OEM may be submitted with the contractor's quote for the repairs. Again, the cost of third-party testing of lifting equipment to be repaired must be accompanied by three pre-quotes from third parties duly registered as Lifting Machinery Entities with the Department of Employment and Labour. Of the three pre-quotes, the cheapest quote must be selected for repair spares and for third-party testing of lifting equipment after the repairs. An invoice of the repairs of lifting equipment when submitted to JW must be accompanied by the pre-invoices of the spares and third-party LMI used.

WARRANTY

The warranty period for repaired equipment shall be for a minimum period of three (3) months. The warranty period shall be extended for a period of time equal to the period that the lifting equipment has been out of service due to the warranty failure in the warranty period.

SPECIFICATION

DURATION OF THE CONTRACT

The contract is for a period of thirty six (36) months on an “as and when” required basis.
