

The diagrams illustrate the cross-section of a cable trench installation. The left diagram shows a trench with a compacted soil top, a danger tape, a layer of sifted insitu backfill, LV and control cables, and a layer of sifted insitu bedding. The right diagram shows a similar setup but with signal cables instead of LV and control cables. Both diagrams include dimensions for the trench depth (500mm) and the bedding layer (100mm).

COMBINED LV, CONTROL & SIGNAL CABLE TRENCH
