1. PURPOSE OF THE REQUEST FOR INFORMATION

To acquire market relevant information regarding the availability of portable sources of water in the City of Johannesburg to supplement Johannesburg Water's Water Demand Management through shot-term programs

2. BACKGROUND

Johannesburg Water invites service providers to respond to a Request for Information for the **Johannesburg Water's Water Demand Management Strategy,** in line with Alternative Water resources**.** This RFI is strictly to solicit market related information from potential bidder(s) for the **short-term water service program for private water producers to supplements water demand within the City of Johannesburg** This RFI does not constitute; an offer; or any impression none so ever to do business with Johannesburg Water.

3. SCOPE OF WORK

The purpose of this document is to guide Service Providers regarding the information being requested to participation in the Short-Term Water Services Program. The alternative sources shall include but not limited to Aboveground Water and Underground Water, with the aim of building a short business case, inclusive of all factors.

3.1 Whilst the information contained in this request has been prepared in good faith, it does not purport to be comprehensive or to have been independently verified. Johannesburg Water does not make any representation or give any warranty whatsoever, whether express or implied, with respect to the veracity, adequacy, accuracy, reasonableness or completeness of the information contained in the RFI.

3.2 Where relevant, all Information contained in this RFI, including financial, commercial, legal and technical information, is included for illustrative and information purposes only.

3.3 Each Service Provider shall be solely and fully responsible for satisfying itself as to the information required to respond to the request. This RFI does not constitute advice and

should not be relied on for this purpose. In addition, it does not constitute an offer to enter into any contract with Johannesburg Water.

3.4 All Service Providers should seek their own financial, commercial, legal and technical advice and at their own cost.

4. GENERAL INFORMATION REQUEST FOR WATER SERVICES PROGRAM

4.1. Programme

4.1.1. The objective of the Program is to obtain additional short-term portable water, including Abstraction, Treatment Processes, Storage System, before actual access to Johannesburg Water infrastructure. Johannesburg Water has limited funds and is looking for overall contract value considerations.

4.2. Water Capacity and/or Size, Quality

4.2.1. Ideally, each resource facility must be located within the borders of the City of Johannesburg and the capacity to be made available not to exceed 20 Ml/d

4.2.2. Water Quality standard, in the league of SANS 241, and all elements related to the construction, performance and monitoring to be affected in terms of South African National Standards (SANS)

4.3. PRICING

4.3.1. The Tariff will be determined by scenario-based mechanisms, not withstanding competitive analysis based on production considerations. In price determination, consideration may also be given to contract time differentiation.

4.3.2. The Service Providers must take into account all costs including any duties, taxes and levies applicable to the tariff structure (including VAT).

4.3.3. Service Providers are to propose a price to be paid in R/kL.

4.3.4. Prices are fixed in South African Rand (ZAR) for the duration of the term of the scenario and contract period and not subject to adjustment for information analysis.

4.4. GENERAL SPECIFICATION

4.4.1. OPERATIONS AND MAINTENANCE

4.4.1.1. Service Providers will be responsible for securing all Operation and Maintenance requirements of the Facilities they propose.

4.4.1.2. Service Providers shall be responsible for Operating and Maintaining the Facility in conformity with all applicable Laws and Consents and so as to comply with applicable legislation.

4.4.1.3. Although the Service Provider may subcontract its Operating and Maintenance requirements for each Facility to reputable operating contractor(s), it shall notwithstanding such subcontracting retain all risk associate with delivery.

4.4.2. METERING

4.4.2.1. The Service Provider shall be responsible to install the Metering Installation which shall comply with the Johannesburg Water's Metering Standards.

4.4.2.2. The Metering Installation shall be used for billing purposes under the Service Provider with Johannesburg Water shall be responsible for data retrieval from the Metering Installation for invoicing purposes.

4.4.2.3. The Service Provider shall be responsible for procuring, installing, testing, commissioning, operating and maintaining the Metering Installation.

4.4.2.4. The Service Provider shall provide meter configuration details including the remote access information for site and installation verification purposes by Johannesburg Water.

4.4.2.5. The Service Provider shall be required to provide commissioning and latest maintenance reports for the Metering Installation, as well as calibration certificates when required.

4.4.3. DELIVERY POINT

4.4.3.1. Johannesburg Water and Service Provider will engage to propose the Delivery Point at which metered deliveries of each water Facility will be made.

4.4.3.2. The Delivery Point shall be located at the point approved by Johannesburg Water, and Johannesburg Water shall have both the point of connection and supervisory control.

4.4.3.3. The Delivery Point must be clearly demarcated on the Single Line Diagram approved by Johannesburg Water and where there is more than one Delivery Point for the same Facility this must be also indicated.
